BIG MEN OF NORTH AND SOUTH AMERICA MEET NEXT JANUARY

Second Pan-American Scientific Congress Will Promote Good Will and Trade

(Pan-Americanism: The second Pan-American Scientific Congress, by Dr. Glen Levin Swiggett, the assistant secretary of the congress.)

Many matters of international character with particular significance to the college world have happened during the scholastic year now closing. The present European war has precipitated a general interest throughout the nation in foreign trade; an interest, however, that has slowly been developing through the vision and courage of an organization like the Pan-American Union, conferences and societies with peace and international comity propaganda, large business concerns with foreign trade connections, and various individuals who, by virtue of their position in the service of the government of the United States or in the educational and business world, have not only seen the tendency in the United States to view all things from an enlarged or international viewpoint, but have materially assisted in directing, through the press and in public utterance, an ever growing current of sentiment for a larger commerce and comity of the United States in relation with the other countries of the world.

Among these none stand potentially in closer relation with us than the countries of Latin America. Linked to us by propinquity, a common origin and political destiny, Pan-Americanism is not a visionary dream, but is purposed with immediate and practicable results fraught with untold advantages to the entire world through the increase in culture and commerce among the participating countries of this new-world group of nations.

During the present year two great Pan-American gatherings convene in Washington under the auspices of the government of the United States. The first of these, the Pan-American financial conference, occurred the week of May 24, 1915. In this conference delegates from the Latin American countries conferred with representative bankers and businessmen from our nation at the Pan-American Union, on invitation of the Secretary of the Treasury, on financial questions of pertinent interest that must have far-reaching beneficial results to Pan-American banking and commerce.

Of greater interest to the educational world, however, is the Scientific Congress that will convene in Washington beginning December 27, 1915, and concluding its sessions on January 8, 1916. Through the splendid cooperation of the Latin American countries the second Pan-American Congress, likewise held under the auspices of the United States government through the Department of State, bids fair to be not only thus far the greatest Pan-American Congress, but the most important international scientific congress ever held in the United States.

The first congress of this name was held in Santiago, Chile, in 1908. It had its origin in earlier Latin American scientific congresses, and at the time of the Santiago congress was enlarged through the generous initiative of the Latin American countries to include the United States. This congress was well attended by visiting delegates from the United States. On its adjournment, entirely unsolicited on the part of the latter, Washington was designated as the place of meeting of the second congress.

This honor has a singular appeal to our nation at this time. The present European war has brought the western hemisphere suddenly face to face with grave economic problems that invite the serious attention of scientists and experts in the various fields of applied science.

The Scientific Congress will concern itself with the constructive discussion of these as well as with the contributions in the domain of pure science wherein great advance has been made since the last Congress in Santiago, Chile. Science is comprehensively defined by the Congress and includes, under nine heads, such main subjects as Anthropology; astronomy, meteorology and geology; conservation of natural resources; agriculture, irrigation, and forestry; education; engineering; international law, public law and jurisprudence; mining and metallurgy; economic geology and applied chemistry; public health and medical science; transportation, commerce, finance and taxation.

The significance of the Congress, through the importance of the above subjects, is greatly enhanced through the international reputation of the persons chosen to arrange for the program of the different sections of the Congress, most of whom have an intimate first-hand acquaintance as well with the local resources, development and scientific interest in the various Latin American countries.

Washington offers unusual advantages for a congress of this nature. It enjoys an enviable distinction among the world capitals for the keen scientific interest and investigation in its various federal bureaus, the varied and extensive nature of its libraries and museums, the beauty of its buildings and the growing importance of detached but semi-official institutions and bureaus engaged in work of international scope.

Among these none occupy a position of greater importance than the Pan American Union, the governing board of which, composed of the diplomatic representatives of the participating Latin American countries, with the Secretary of State of the United States as ex-officio chairman, has signally honored the second Pan American Scientific Congress by authorizing the use of its beautiful building for the office and sessions of the Congress. The board also, in response to the

request of the president and secretary of state of the United States, authorized to act as secretary general of the Scientific Congress, the director general of the Pan American Union, the Honorable John Barrett, who has doubtless done more than any one American in the establishment of commerce and comity among the republics of the western world; whose good fortune it has also been to see, through the seeming accident of war, the potential promise of his great work being realized so soon.

**AMATEUR NIGHT AT
FORT SHAFTER AERODROME**

Tonight will be "Second Battalion Night" at the Aerodrome, Fort Shafter, in honor of the troops who have been in the field for two weeks on maneuvers. In addition to two reels of comedy moving pictures and an orchestral program, Lieut. C. R. Abraham, post exchange officer, has arranged for a two-hour vaudeville show by the 25th Infantry comedy

MANY CENSORS FLAY 'HYPOCRITES'

That Lois Weber has handled a delicate subject in a most masterly and daring manner in her wonderful photoplay, "Hypocrites," is the consensus of opinion of moving-picture managers. However, that is where the consensus ends.

Regarding the propriety of the picture, which will be shown at the Liberty theater for four days, commencing tomorrow, Sunday, evening, there is a large diversity of opinion. Many of the leading censors of the country are loud in their praises of this picture, while others are equally bitter in their denunciation of the exhibition of such a film. Honolulu theater-goers will be given an opportunity to judge for themselves.

In Los Angeles the board of censors forbade a production of the film, company. There will be dancing, singing and all sorts of stunts, featuring Jenkins, Wiley, Spotlight, King, Braun, Minor and Jackson. The orchestral program under Director Francis Leigh will be as follows: March—The Portly Major.....Rolfe Trot—Aha Dabe Honeymoon.....Fields Two-Step—Back to the Carolina You

following a trial run, and the management of a theater in the City of Angels was compelled to take the matter to court, winning his case and being allowed to show "Hypocrites."

The San Jose (California) Mercury-Herald opposed the picture editorially, and in reply to a letter of protest from one of its subscribers once more used its editorial columns, saying in part, as follows:

"With reference to the play 'Hypocrites,' the Mercury-Herald has not changed its opinion. If, in order to hear a great sermon, it is necessary to have a nude woman parading abroad on the stage, we should say the sooner we get back to barbarism the better; the 'naked truth' needs no such symbolic vulgarity to impress those who want to hear it."

Love—Niagara.....Schwartz Rag—They're All Goin' to the Movies.....Allen Rag—Chatterbox Rag.....Botsford Medley—Remick's Song Hits.....Lampe Trot—Pickin' On the Old Banjo.....Widmer Tango—Two Much Mustard.....Macklin

'MONEY' FULL OF REAL THRILLERS

"Money," the strong sociological offering of the United Keanograph Film Company, a new concern in the producing world, has placed its producers in the forefront of makers of films. "Money" tells a gripping story, and the staging is the most elaborate conceivable. Money was no object in the production of "Money," of its elaborate scenes, costumes and stage settings. In one of the scenes an entire palace is burned to the ground, all of its rich contents being fed to the flames to make "copy" for the man with the camera.

The action furnishes thrill after thrill in rapid succession and is one that compels the auditor to hold his breath a large part of the time.

The struggle of capital and labor in the year 1921 is the theme of "Money," which will be the offering at the Bijou theater from now to next Wednesday night.

Japanese mills are suffering from a shortage of cotton supplies.

646% Increase Tells the Story of Nation-wide Chandler Demand

7-Passenger
Body**

CHANDLER HISTORY AND CONVINCING INCREASES

Chandler Light-Weight Six, the first high-grade six-cylinder car weighing less than 3000 lbs. and selling for less than \$2000, introduced to the public during the Chicago Automobile Show, January, 1913.

Ground broken for Chandler factory, April 6, 1913.

Delivery of Chandlers in quantities began July 30, 1913. Selling price, \$1785.

The year 1914 brought very general recognition to the Chandler car. Leading dealers sought the Chandler sales agency and sales leaped forward. Selling price, \$1595. The Chandler Light-Six idea was now thoroughly established.

Official tests by Chicago and New York Automobile Clubs proved Chandler economy beyond shadow of doubt.

Year 1915 opened with the announcement of the new Chandler price, \$1295, a record-making low price for a high-grade six. Such a car at such a price stamped the trade toward the Chandler.

Two new factory buildings and a large addition to the main factory completed by March 1 to take care of added production.

Chandler production increases rapidly. By April 1st we were shipping 40 cars per day, by May 5th 50 cars per day, by May 20th 60 cars per day. April shipments showed 233% increase over April, 1914.

May shipments showed 493% increase over May, 1914.

June shipments showed 646% increase over June, 1914.

These Figures Tell the Story of Chandler Success.

The demand for the new seven-passenger Chandler is sweeping the whole country. It's not a question of how many cars we can sell, but how many cars we can build. And we have reached a high mark attained by few manufacturers. We will supply seven-passenger Chandlers to ten thousand new owners this year, and even then thousands of men who place their orders late will have to be disappointed.

What is the reason for this tremendous growth in Chandler demand? Just ask yourself this question. The answer is obvious when you know the Chandler car.

It's simply because, regardless of price reductions, regardless of new models, there is no other car of such superior character selling at a similar price.

By all means, go see your Chandler dealer and get thoroughly posted on the Chandler. Go and see what a wonderful car this is that sells for \$1495.

Bear in mind, too, that there isn't anything experimental about the Chandler. Bear in mind that thousands of Chandlers are on the road giving the most satisfying service to Chandler owners.

Remember, too, that no other car selling for less than \$2000 possesses all these high-grade features of design, construction and equipment found on the Chandler:

The marvelous Chandler motor, of Chandler design and built in the Chandler factory. A powerful, quiet, economical, beautifully finished motor any man may well be proud of. Bosch Magneto and Bosch Spark Plugs. Gray & Davis Electric Starting Motor. Gray & Davis Electric Generator. Rayfield Double-Jet Carburetor. Mayo Genuine Mercedes Type Radiator. Worm-bevel Rear Axle, smooth-running and silent.

Cast Aluminum Motor Base extending from frame to frame. Three Silent Chains, enclosed and running in bath of oil, for driving motor shafts. Genuine Hand-buffed Leather Upholstery. Auxiliary seats in tonneau of touring car are instantly adjustable, folding away entirely out of sight into the back of the front seats. The greatest improvement in seven-passenger construction. Firestone Demountable Rims.

Stewart Vacuum Gasoline Feed. Imported annular ball-bearings. Golde Patent One-man Top covered with genuine Neverleek. Jiffy Curtains. Blair Patent Top-Holders. Motor-driven Horn. Stewart-Warner Magnetic Speedometer. Instantly Adjustable Tire Carrier (no straps) at rear of tonneau. All the usual incidental equipment.

Roadster or Seven-Passenger Touring Car, \$1495
